MOHAMMED ILYAS B

Technology Analyst / Angular Developer / Full-Stack Developer

Chennai, India | +91 7397751255 | Ilyas.fa007@gmail.com

PROFESSIONAL SUMMARY

Senior Frontend / Interaction Engineer with 7+ years of experience designing and owning high-scale, user-centric web applications using Angular and MEAN stack. Specialized in building interaction-heavy systems with strong guarantees on UX correctness, accessibility, and performance.

Proven track record of owning end-to-end frontend and API systems, ensuring contract stability, system reliability, and seamless user experiences across enterprise and fintech platforms.

Actively leveraging AI-assisted development for component generation, test automation, edge-case discovery, and system behavior validation. Strong advocate of building correct, interpretable, and safe systems in AI-augmented environments.

TECHNICAL SKILLS

- **Frontend / Interaction Engineering:** Angular (6–18+), TypeScript, RxJS, Interaction Design, UX Correctness, Accessibility (WCAG), Component Architecture, Design Systems, Performance Optimization (Core Web Vitals, Lighthouse).
- **API & Backend Engineering**: Node.js, Express.js, REST API Design, API Contracts, Versioning, Backward Compatibility, Query Optimization, Data Access Patterns, Contract Testing & API Stability.
- **AI-Augmented Engineering**: AI-assisted UI & API code generation (Copilot, ChatGPT), Automated test generation and edge-case simulation, UX behavior validation under ambiguity, Failure-mode and performance analysis using AI.
- **Data & Platform Awareness**: MongoDB, MySQL, PostgreSQL, Data modeling, transformation basics, Data validation and consistency patterns
- **DevOps & Delivery:** CI/CD Pipelines (Jenkins), Docker, Kubernetes (working knowledge), Release workflows, rollback strategies, Performance monitoring and optimization

PROFESSIONAL EXPERIENCE

Senior Software Developer

Infosys Limited, Chennai, India *Dec/2022 – Present*

1. TalkTalk Broadband Platform (UK)

Role: Lead Frontend / Full-Stack Engineer

- **Owned end-to-end frontend architecture** for customer-facing broadband platform, improving release velocity by 20% and increasing user engagement.
- Designed scalable Angular systems ensuring **UX correctness, accessibility compliance, and performance budgets** across critical user journeys.
- Leveraged AI-assisted tools to **generate UI components, automate testing, and identify edge-case failures**, improving development efficiency.

2. ***Wabtec Railway Management System (Canada)***

Role: Full-Stack Engineer

- Built cross-platform desktop applications using **Angular** + **ElectronJS** with offline-first capabilities, reducing operational downtime by 15%.
- Owned frontend-backend integration ensuring **real-time system visibility and data consistency** across modules.
- Delivered 280+ user stories in agile environment with strong ownership and execution discipline.
- Designed resilient UI flows with fallback handling for network failures and edge scenarios.

3. ***BOFA Search Analytics Platform (Bank of America)***

Role: Full-Stack Engineer

- Architected high-performance Angular modules enabling real-time analytics with millisecond latency.
- Designed complex interaction systems including **entity relationship graphs, timelines, and investigation dashboards**.
- Owned **UI correctness and system integrity**, implementing RBAC, audit logging, and compliance-driven UI behaviors.
- Improved modularity through lazy loading, state management, and scalable architecture patterns.
- Improved modularity through lazy loading, state management, and scalable architecture patterns.

Frontend Engineer / UI Consultant

ASZ Technologies Limited, Bengaluru, India *Dec/2021 – Nov/2022*

1. ***Hotel Web Check-in System (US)***

- Designed responsive Angular-based onboarding system reducing manual effort by 40%.
- Built reusable UI components improving maintainability and scalability.
- Enhanced UX by refining interfaces in collaboration with designers, boosting engagement by 30%.

2. ***Gaming Analytics Dashboard (R&D)***

- Developed real-time dashboards with advanced visualizations and interaction flows.
- Implemented mobile-first responsive UI with strong usability focus.
- Collaborated with product teams to enhance UX clarity and engagement.

UI / Frontend Developer

TVM InfoTech Private Limited, Chennai, India *Dec/2019 – NOV/2021*

Tamil Nadu Government Schools Platform

- Built scalable Angular UI supporting multi-device compatibility and multilingual access.
- Improved application performance by 25% through DOM optimization and efficient rendering.
- Implemented modular architecture with lazy loading and route optimization.
- Delivered inclusive UX solutions improving accessibility across diverse user groups.

AI IN ENGINEERING PRACTICE

- Used AI tools to accelerate UI and API development, reducing implementation time
- Automated test generation and edge-case discovery for frontend and backend systems
- Applied AI-driven analysis to detect performance bottlenecks and UX inconsistencies
- Reviewed and validated AI-generated code to ensure correctness, safety, and reliability

EDUCATION

- ***Post Graduate Diploma in Data Science and Engineering***
  Great Lakes Institute of Management */ 2021*
- ***Bachelor of Science (B.Sc.) in Computer Science***
  Jamal Mohammed College */ 2015*

CERTIFICATION

- ***MEAN Stack Full Stack Master Professional***
  Simplilearn
- ***Mastery in Figma UI/UX, Angular, HTML & CSS, JavaScript, jQuery, Git, MongoDB and AWS in Guvi***
