MOHAMMED ILYAS.B

Technology Analyst / Angular Developer / Full-Stack Developer

Chennai, India | +91 7397751255 | Ilyas.fa007@gmail.com

PROFESSIONAL SUMMARY

Seasoned Full-Stack Developer with over **7+ years of experience** architecting and delivering scalable web applications using the **MEAN Stack**, with deep specialization in **Angular (6+ years)**. Adept at building responsive, high-performance interfaces and robust backend services across diverse domains including finance, e-commerce, and enterprise platforms. Recognized for precision in **UI/UX animation**, **theme toggling**, and seamless user interaction design. Proven ability to **lead cross-functional teams, drive technical strategy**, and ensure delivery excellence through clean architecture, optimized code, and agile collaboration. Passionate about crafting immersive digital experiences that blend design elegance with engineering rigor.

TECHNICAL SKILLS

- **Frontend:** Angular 6–18+, HTML5, CSS3, JavaScript (ES6), TypeScript, SASS, Bootstrap, Tailwind CSS, PrimeNg, Angular Material, RxJS
- **Backend**: Node.js, Express.js, Python (Flask), Java Spring Boot
- **ORM:** MySQL, Mongoose (MongoDB), Oracle
- **Database:** MongoDB, MySQL, Postgres, Firebase
- **Cloud & DevOps:** AWS, Kubernetes, Docker, Jenkins, CI/CD Pipelines
- **Tools:** Git, Jira, Bitbucket, Visual Studio Code, MongoDB, Postman, Docker, Jenkins, Webpack, **Webix, WebixJet**
- **Domain Expertise:** Telecom, E-commerce, Gaming, Education and Finance
- **Architecture & Patterns:** MVC, RESTful APIs, Service Workers, Web Workers, Design Patterns, Unit Testing (Jest, Jasmine)

PROFESSIONAL EXPERIENCE

Technology Analyst / Full-stack Developer

Infosys Limited, Chennai, India *Dec/2022 – Present*

1. Project: TalkTalk Broadband Website, UK

- **Role**: Lead UI Developer / MEAN Stack Developer
- **Technologies**: Angular 12, Node.js, TypeScript, HTML5, SASS, Bootstrap and MongoDB
- **Achievements**:
    - **Led the end-to-end UI revamp** of product and service pages using Angular 12 and Bootstrap, achieving a 20% faster release cycle and boosting user engagement metrics.
    - **Developed secure Node.js middleware** for handling customer data, integrating RESTful APIs with MongoDB to support real-time updates and seamless user interactions.
    - **Facilitated client demos and technical workshops**, translating business requirements into actionable UI/UX strategies and ensuring stakeholder alignment.
    - **Optimized performance and responsiveness** across devices using SASS and HTML5, improving Lighthouse scores and accessibility compliance.

2. Project: Wabtec – Railway Department Management Application, Canada

- **Role**: Full-Stack Developer
- **Technologies**: Angular, TypeScript, ElectronJS, Service Worker, Node.js, Oracle
- **Achievements**:
    - **Developed cross-platform desktop applications** using ElectronJS and Service Workers, enabling offline access and reducing operational downtime by 15%.
    - **Integrated Angular frontend with Node.js services**, ensuring seamless data flow and real-time monitoring across railway department modules.
    - **Delivered 287 user stories** within a compressed timeline, exceeding client expectations and demonstrating agile execution under pressure.
    - **Led sprint coordination and workload distribution**, fostering collaboration and ensuring timely delivery of all functional milestones.

3. Project: BOFA – Search Analytics Platform (Bank of America)

- **Role**: Senior Angular Developer
- **Technologies**: Angular 14, Webix, WebixJet, TypeScript, Oracle, Java Spring Boot
- **Achievements**:
    - **Architected and implemented** dynamic Angular 14 modules using Webix and WebixJet for real-time search analytics, enabling investigators to filter and visualize complex datasets with millisecond response times
    - **Integrated secure role-based access control (RBAC)** and audit logging directly into the UI layer, ensuring compliance with stringent banking and regulatory standards.
    - **Designed reusable UI components** for fraud detection workflows, including timeline visualizations, entity relationship graphs, and case tracking dashboards.
    - **Collaborated with backend teams** to optimize RESTful API consumption and streamline data binding between Angular and Java Spring Boot services.
    - **Enhanced** modularity and maintainability by implementing lazy loading, route guards, and state management strategies tailored for large-scale enterprise applications.

Front-end Developer

ASZ Technologies Limited, Bengaluru, India *Dec/2021 – Dec/2022*

1. Project: Web Check-in Hotel Based Website, US

- **Role**: UI Consultant
- **Technologies**: Angular 13, TypeScript, HTML5, SCSS, Bootstrap
- **Achievements**:
    - **Structured and implemented a responsive hotel check-in interface** using Angular 13 and Bootstrap, automating guest onboarding and reducing manual workload by 40%.
    - **Crafted modular UI components** with SCSS and TypeScript, improving maintainability and accelerating future feature rollouts.
    - **Provided UI/UX consulting** to align design decisions with business goals, ensuring intuitive navigation and high conversion rates.
    - **Optimized frontend rendering and API performance**, achieving a 30% boost in page load speed and enhancing overall user engagement.

2. *Project: Byte Brew – Gaming Analytics Dashboard (Internal R&D)*

- **Role**: UI Consultant
- **Technologies**: Angular 14, Bootstrap, CSS3, TypeScript
- **Achievements**:
    - **Architected and deployed** a real-time analytics interface using Angular 14 to monitor player activity, match outcomes, and leaderboard dynamics tailored for esports and mobile gaming platforms.
    - **Implemented responsive UI components** for live scoring, heatmap overlays, and session metrics using Bootstrap 5 and CSS3 transitions, driving higher user interaction and visual clarity.
    - **Partnered with UX and product teams** to craft a visually polished, mobile-first experience aligned with competitive gaming aesthetics and usability standards.
    - **Structured the application using component-based architecture**, enabling seamless feature expansion, simplified maintenance, and efficient code reuse.

UI/Frontend Developer

TVM InfoTech Private Limited, Chennai, India *Dec/2019 – NOV/2021*

1. *Project: TN Schools - Tamil Nadu Government Schools Website*

- **Role**: Angular Developer
- **Technologies**: Angular 10, TypeScript, HTML5, CSS3, PrimeNg
- **Achievements**:
    - **Crafted device-agnostic UI elements** using Angular and Prime NG, ensuring seamless interaction across desktops, tablets, and mobile devices.
    - **Applied component-based architecture and route-level code splitting**, boosting scalability and simplifying future enhancements.
    - **Enabled region-specific filtering and multilingual capabilities**, enhancing inclusivity and usability for diverse user groups statewide.
    - **Accelerated client-side performance** by refining DOM rendering and minimizing resource overhead, leading to a 25% faster page load experience.

EDUCATION

- ***Post Graduate Diploma in Data Science and Engineering***
  Great Lakes Institute of Management / *2021*

- ***Bachelor of Science (B.Sc.) in Computer Science***
  Jamal Mohammed College / *2018*

CERTIFICATION

- ***MEAN Stack Full Stack Master Professional Simplilearn***
- ***Mastery in Figma UI/UX Guvi***
- ***Graphics Design and Adobe Technologies***
- ***AWS Cloud Practitioner (In Progress)***
